

IT HARDWARE, SOFTWARE & SYSTEMS SECURITY

“Let Tierney’s design and implement a customised, secure and robust IT infrastructure for your organisation, eliminating points of exposure for viruses, hackers and spam, providing maximum effectiveness and return on investment.”

Due to increasing need to both protect IT systems and manage the IT budget within an organisation, companies need the advice and intervention of an experienced IT provider. At Tierney’s we are constantly developing and improving our IT systems and networks, extending the range of hardware and software solutions we provide. To keep your business up to date and to mitigate vulnerabilities, a trusted partnership is imperative. Tierney’s has such trusted partnerships with some of the world’s leading IT companies such as Microsoft, HP, NCR, Watchguard and ESET providing your business with ‘best of breed.’

IT HARWARE, SOFTWARE & SYSTEMS SECURITY

Main Benefits Experienced by our customers:

- We are a 'one stop shop' we provide hardware, software and we install, implement and support it.
- Increased IT productivity and efficiency, minimising downtime, enabling business continuity and disaster recovery.
