NCR Aloha Online Ordering

Add online ordering to increase customer traffic and restaurant sales

NCR Aloha Online Ordering makes it easy and convenient for your customers to do business with you. Use this hosted online application to provide customers with instant access to menus and pricing, transmit orders electronically to stores and drive revenues. Benefits include:

• Extending your business

With NCR Aloha Online Ordering, you're no longer limited to conventional business hours. Customers can place orders anytime, anywhere, strengthening their connection with your restaurant.

Gaining customer intelligence

Customers gladly input detailed personal data into the online ordering solution, providing you with powerful intelligence you can use to optimize marketing and operational decisions.

Driving customer traffic

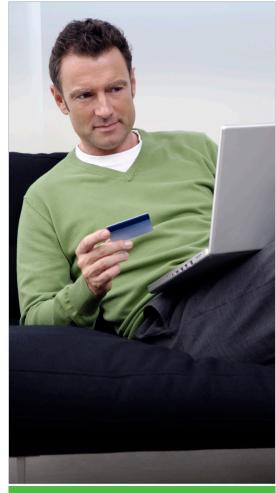

Customers can interact with your restaurant in a non-traditional way. Online ordering allows customers to order the food they want, when they want it, and enjoy it in the comfort of their own homes or on the go.

Placing accurate orders

Since NCR Aloha Online Ordering integrates directly with your store's POS system, customer transactions are fast and accurate. Customers see exact costs, including taxes, when they check out.

Decreasing labor and data errors

Moving ordering from faxes to the online application reduces staff labor and data input errors. Customers enter web orders, including payment data, which are instantly distributed to the store's POS system.

For more information, visit alohancr.com or call us at (888) 353-4275.

Maintaining operational visibility

Using a single, integrated system increases kitchen efficiency and order accuracy. Managers can monitor in-store and web orders simultaneously, to deliver a superior customer experience that extends beyond the restaurant's four walls.

Real-time communication of orders

The web ordering and the POS system at the store tracks orders continuously. This guarantees that orders are actually received by your stores. Provide guests with the exact amount totals.

• Security and convenience

Customers can enter their payment information as part of the web order and store it for later use, speeding up the transaction and making it more convenient for their next web order.

Installing the functionality remotely

Aloha Online Ordering can be rolled out to individual or multiple locations 100% remotely. No site visits are needed with no need to interrupt your daily operations.

Key Features

- An online ordering application that is delivered as software as a service
- Offers customers a convenient, easy way to order food and beverages
