

NCR KT2200 KITCHEN TOUCH DISPLAY

HIGH VISIBILITY, DURABILITY AND EASE-OF-USE HELP GET THE MOST OUT OF KITCHEN OPTIMIZATION SOLUTIONS

In the age of mobility, restaurants that use the NCR kitchen production solution are ahead of the Omni-Channel game. And that means greater opportunity for increased same-store sales and the ability to handle that increased business without missing a beat. The NCR kitchen production solution can greatly improve customer satisfaction by helping your staff produce consistently great food efficiently, quickly and accurately whether the order was placed on-site, online, via mobile app, over the phone or through your in-store kiosk.

Highly visible, easy to use

At 12.5 x 21.5 inches (yet only 1.85 inches wide at its largest point), the KT2200 is one of the bigger displays built specifically for restaurant kitchens. The touch screen is receptive to gestures and single-touch so anyone who uses a smart phone will be comfortable using the KT2200 as well.

Purpose-Built for your harsh, space-starved kitchen

Neatness and cleanliness are critical to an efficient, well-run kitchen. NCR KT2200 is fully enclosed in stainless-steel that cleans easily and prevents typical kitchen contaminants from entering the monitor housing. It can be mounted on the wall or on a radial arm where it can be adjusted to compensate for employees of differing heights. When mounted, the stainless-steel enclosure highlights the clean, sleek kitchen look many restaurants strive for.

Fully integrated

The KT2200 Kitchen Touch Display has a tough full HD glass screen with PCAP touch technology and comes standard with an integrated speaker enclosed in the stainless-steel case. It integrates seamlessly with NCR's KC4 Kitchen Controller and can be used with kitchen systems from other providers as well.

Enabling the kitchen production solution can be challenging because the typical restaurant kitchen is a rough environment with many factors that affect the life of hardware. Some factors include certain types of ingredients, high temperatures and the level of care employees take when handling the equipment. Those are just a few of the reasons most kitchen hardware has a limited life. To address these challenges, you need much more than consumer-grade or even FOH-grade hardware. You need the NCR KT2200 Kitchen Touch display.

The form factor of the NCR KT2200 is lighter, simpler, more cost-effective and more resistant to external contaminants than most other similarly sized rugged devices on the market today.
